

Project CY 8609

Task

1. Describe the technical facility located vic:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

* Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

Site is a compound of numerous structures & objects. A sense of being run down is present. Impression of several round, silver, perhaps pipes, running parallel. Various machinery here & there; impression of "abandoned," but of "not being used" for a while. 2 points of ^{possible} interest in part. First (ca. mid '83?) large black metal cylinders w/ tapered "caps" to be attached & moved elsewhere. Next (in late '84?) keep running sound & large mass in shape moving off diagonally ~~at~~ first starts for very short distance, then slowly further on.
